

PLC Automation Sales information AC500 – Availability of battery safety datasheets in internet

Availability of Safety Datasheet in internet for the following ABB batteries:

Lithium battery:

- TA521 for all AC500 CPUs
- TA541 for PM595 PLC
- 07LE90 for legacy AC31 90 series

23.03.2016

Dear Colleagues & AC500 users,

We are pleased to announce the availability in internet of the safety Datasheet and all the relevant documents regarding the Lithium Batteries used in AC500 CPUs or legacy products AC31 90 Series.

The documents are available on ABB Website for each relevant battery from each CPU types.

Description

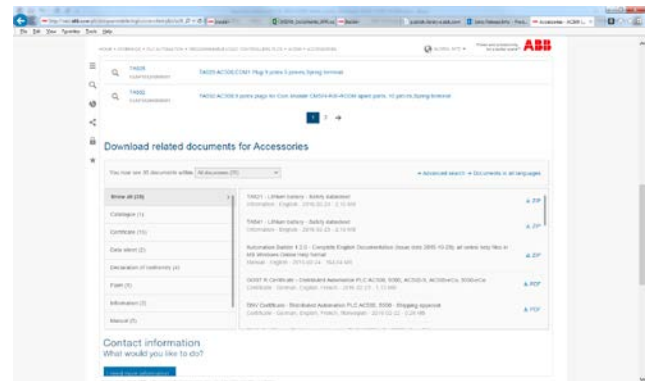

The documents contain following information or datasheets:

- ABB Declaration on used supplier battery for each CPU type
- Safety datasheet from suppliers
- Technical data of each battery from supplier
- Technical drawing of the ABB battery
- Additional certificate or declaration from supplier when existing (e.g. Transportation rules...)

Availability of the documents / Links

The documents can be found in ABB Website (<http://new.abb.com/plc>) for each battery and also into ABB Library.

- [TA521 - AC500 PLC battery](#)
- [TA541 - AC500 PM595 PLC](#)
- [07LE90 - AC31 legacy 90 series](#)

Do not hesitate to contact us for any further clarifications.

Best regards,

Rémy Ameloot
